

## NaV1.7 polyclonal antibody

Catalog: BS90911

Host: Rabbit

Reactivity: Human

### BackGround:

Mediates the voltage-dependent sodium ion permeability of excitable membranes. Assuming opened or closed conformations in response to the voltage difference across the membrane, the protein forms a sodium-selective channel through which Na<sup>+</sup> ions may pass in accordance with their electrochemical gradient. It is a tetrodotoxin-sensitive Na<sup>+</sup> channel isoform. Plays a role in pain mechanisms, especially in the development of inflammatory pain.
