## PRODUCT DATA SHEET

# **Bioworld Technology CO., Ltd.**

# Laminin α-5 (N2402) Peptide

Cat No.: BS9138P

## **Background**

Laminins are essential and abundant structural non-collagenous glycoproteins localizing to basement membranes. Basement membranes (cell-associated extracellular matrices (ECMs)) are polymers of laminins with stabilizing type IV collagen networks, nidogen, and several proteoglycans. Basement membranes are found under epithelial layers, around the endothelium of blood vessels, and surrounding muscle, peripheral nerve, and fat cells. Formation of basement membranes influences cell proliferation, phenotype, migration, gene expression, and tissue architecture. Each laminin is a heterotrimer of  $\alpha$ ,  $\beta$ , and  $\gamma$  chain subunits that undergoes cell-secretion and incorporation into the ECM. Laminins can self-assemble, bind to other matrix macromolecules, and have unique and shared cell interactions mediated by Integrins, dystroglycan and cognate laminin receptors.

#### **Swiss-Prot**

O15230

# **Applications**

Blocking

## **Specificity**

This peptide can be used with studies using BS9138 Laminin  $\alpha$ -5 (N2402) pAb.

## **Purification & Purity**

Synthetic peptide Laminin  $\alpha$ -5 (N2402). (Note: the amino acid sequence is proprietary). The purity is > 98%.

#### **Product**

1 mg/ml in DI water.

#### **Storage & Stability**

Store at  $4\,\mathrm{C}$  short term. Aliquot and store at  $-20\,\mathrm{C}$  long term. Avoid freeze-thaw cycles.

#### **Research Use**

For research use only, not for use in diagnostic procedure.
