

VEGFR2 polyclonal antibody

Catalog: BS91437

Host: Rabbit

Reactivity: Human, Mouse, Rat

BackGround:

Three cell membrane receptor tyrosine kinases, Flt (also designated VEGF-R1) (1-3), Flk-1 (also designated VEGF-R2) (4-6) and Flt-4, putatively involved in the growth of endothelial cells, are characterized by the presence of seven immunoglobulin-like sequences in their extracellular domain. These receptors exhibit high degrees of sequence relatedness to each other as well as lesser degrees of relatedness to the class III receptors including CSF-1/Fms, PDGR, SLFR/Kit and Flt-3/Flk-2. Two members of this receptor class, Flt-1 and Flk-1, have been shown to represent high affinity receptors for vascular endothelial growth factors (VEGFs) (3,5). On the basis of structural similarity to Flt and Flk-1, it has been speculated that Flt-4 might represent a third receptor for either VEGF or a VEGF-related ligand.

Product:

Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

Molecular Weight:

152 kDa

Swiss-Prot:

P35968(Human) P35918(Mouse) O08775(Rat)

Purification&Purity:

Peptide affinity purified

Applications:

ICC:1:50-1:200

IHC:1:50-1:200

WB:1:500

FC:1:50-1:100

Storage&Stability:

Store at +4 °C after thawing. Aliquot store at -20 °C or

-80 °C. Avoid repeated freeze / thaw cycles.

Specificity:

VEGFR2 polyclonal antibody detects endogenous levels of VEGFR2 protein.

DATA:

ICC staining VEGF Receptor 2 in HepG2 cells (green). The nuclear counter stain is DAPI (blue). Cells were fixed in paraformaldehyde, permeabilised with 0.25% Triton X100/PBS.

ICC staining VEGF Receptor 2 in HUVEC cells (green). The nuclear counter stain is DAPI (blue). Cells were fixed in paraformaldehyde, permeabilised with 0.25% Triton X100/PBS.

Note:

For research use only, not for use in diagnostic procedure.
