

PRDX2 monoclonal antibody

Catalog: MB9447

Host: Mouse

Reactivity: Human

BackGround:

The peroxiredoxin (PRX) family comprises six antioxidant proteins, PRX I, II, III, IV, V and VI, which protect cells from reactive oxygen species (ROS) by preventing the metal-catalyzed oxidation of enzymes. The PRX proteins primarily utilize thioredoxin as the electron donor for antioxidation, although they are fairly promiscuous with regard to the hydroperoxide substrate. In addition to protection from ROS, peroxiredoxins are also involved in cell proliferation, differentiation and gene expression. PRX I, II, IV and VI show diffuse cytoplasmic localization, while PRX III and V exhibit distinct mitochondrial localization. The human PRX I gene encodes a protein that is expressed in several tissues, including liver, kidney, testis, lung and nervous system. PRX II is expressed in testis, while PRX III shows expression in lung. PRX I, II and III are overexpressed in breast cancer and may be involved in its development or progression. Upregulated protein levels of PRX I and II in Alzheimer's disease (AD) and Down syndrome (DS) indicate the involvement of PRX I and II in their pathogenesis.

Product:

Mouse IgG1, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

Molecular Weight:

22 kDa

Swiss-Prot:

P32119(Human)

Purification&Purity:

ProG affinity purified.

Applications:

WB:1:2000-1:5000

IHC:1:50-1:200

FC:1:50-1:200

Storage&Stability:

Store at +4 °C after thawing. Aliquot store at -20 °C. Avoid repeated freeze / thaw cycles.

Specificity:

PRDX2 monoclonal antibody detects endogenous levels of PRDX2 protein.

DATA:

Western blot analysis of Peroxiredoxin 2 on PC-3M (1) and MCF-7 (2) using anti-Peroxiredoxin 2 antibody at 1/2,000 dilution.

Immunohistochemical analysis of paraffin-embedded human liver cancer tissue using anti-Peroxiredoxin 2 antibody. Counter stained with hematoxylin.

Note:

For research use only, not for use in diagnostic procedure.
